## **Be Natural**

## **Manic Street Preachers**

Be natural once in my life Now I'll have to swallow some pride Know that I should never give advice But it's too late now to say goodbyeBe natural, don't want any friends Be natural, come on and hit me again Be natural, I'm repeating myself Be natural, is there anything else? Starbright keep me safe today and tonight No water tastes like lemonade Slowly, slowly it starts to fadeBe natural, with me tonight Be natural, put your fists in my eyes Be natural, so turn me to stone Be natural, just leave me aloneGrown up or backwards born Into eternity and blackholes Floating around up here on my own Screaming at me forever unknownBe natural, be natural, be natural Be natural is there anyone else?
