

You Make the Sun Shine

The Temprees

You make the sun shine in my life with your love
Standing in the window, watching the rain
Searching the clouds for the sun
Then I look and I see you smiling
Then I know the sun is always shining
You make the sun shine, yes you do, in my life, hey
With your love
You make it, you make the sun shine in my life
With your love, with your love
When trouble comes and clouds my mind like that rainy day
I'll be looking for some sun shine
All you have to do is turn your love on, my mind clear
And it seems all my troubles are gone
