

# So Far

## Five Iron Frenzy

I leap from buildings in a single bound  
I'm flying downward near the speed of sound  
If gamma rays blast through my fragile outside a hulking mass  
Grows as my cells divide So far, there's nothing that you and I can't do  
So far, well, mostly so far it's all been you  
So far, so far I'll light on fire with a single spark  
My body battling the wicked dark  
I'll catch bullets  
Just between my bones  
And Vita Rays tear through my chromosomes So far, there's nothing that you and I can't do  
So far, well, mostly so far it's all been you  
So far, something about this still rings true  
So far, all that I need is you
