

Circles

Soul Coughing

When you were languishing in rooms I built to file you in
And when the wind set down in funnel form and pulled you in I don't need to walk around in circles
Walk around in circles, walk around in circles
Walk around in Don't need to walk around in circles
Walk around in circles, walk around in circles
Walk around in And when the ghostly dust of violence traces everything
And when the gas runs out, just wreck it, you insured the thing I don't need to walk around in circles
Walk around in circles, walk around in circles
Walk around in Don't need to walk around in circles
Walk around in circles, walk around in circles
Walk around in Doom da doom da doom
What I'm doing, I'm doing
Doom da doom da doom
What I'm doing, I'm doing Doom da doom da doom
What I'm doing, I'm doing
Doom da doom da doom
What I'm doing, I'm doing But I can't sigh, now that you made the move
It has gone and gone to dogs, lay down on the floor
For the right price I can get everything
Slip into the car, go driving to the farthest star I don't need to walk around in circles
Walk-a, in circles, walk around in circles
Walk around in a Don't need to walk around in circles
Walk around in circles, walk around in circles
Walk around in, walk around in
