

Gold

Mando Diao

La, la, la Twilight in my eye
Then I can see for seven million miles
Twilight in my eye tonight The dreams become clear
The fog gets thicker every time I inhale
Stars look the same to me Oh my God, I went gold when I saw your smiling face
I went gold when I went through this troubling maze
I went gold and my people behind me all did the same Oh my God, I went gold when the ocean swallowed me
I went gold and I felt that I was free
I went gold and my people behind me all did the same Its a way to the heaven, dont try to feel too much
Just let the morning dry your eye
And I say la, la, la Let it all in
Dont feel afraid of dying, just give in
Let it all in tonight Oh my God, I went gold when I saw your smiling face
I went gold when I went through this troubling maze
I went gold and my people behind me all did the same Oh my God, I went gold when the ocean swallowed me
I went gold and I felt that I was free
I went gold and my people behind me all did the same Its a way to the heaven, dont try to feel too much
Just let the morning dry your eye
And I say la la, la la, la La, la, la Oh my God, I went gold when I saw your smiling face
I went gold when I went through this troubling maze
I went gold and my people behind me all did the same Oh my God, I went gold when the ocean swallowed me
I went gold and I felt that I was free
I went gold and my people behind me all did the same La, la, la
