

Raining In Byron

RollerBlue

It's raining in Byron
Said the forecast today
But then when I got there, it was fine
The beach takes away your fright
Cure to the lonely night
Dissolving the words into the light
Gives back your timeChorus
Catching waves it feels like you're here
On the edge of that tropical storm
Summer's gone but you're still searchin'
For what it is that keeps you warm
Ahh, ahh raining in ByronIt's raining in Byron
Said the forecast today
But then when I got there, it was fine
It's here that it all seems real
Back on an even keel
The past now seems quite surreal
And time is moving, time keeps movingChorusLook at me I'm going somewhere
With the wind now what do I care
Don't want to hear that life is unfair
Just go and find it, go and find it
Ahh, ahh raining in ByronIt's raining in Byron, said the forecast today
But then when I got there, it was fine, it was fine
And time, keeps movingChorusSteal away, far away
Searching, searching
