Child Killers

The Delgados

Lately days all seem the same since I lost my brain
Golden nights will see you through
Darker days need glue
How can I find what's right
In truth our love was the night
What's the point to you?

Goodbye wonder, Goodbye brain
This life is insane
No one here gets out alive
Not for life you'd like

How can I find what's right
The truth is our lives were shite
What's the point to you?
Come down, down, down
We have the only gack in town

Understand that it's here that I'm coming from
If I'm wrong or I'm right
Maybe soon we'll find peace in another one
Say goodnight

Eyes of black and lips of grey
When do I get my say?
Hard to come and easy go
Is the life I know

How can I find what's right
The truth is our lives were shite
What's the point to you?
Come down, down, down
We have the only gack in town

Understand that its here that I'm coming from
If I'm wrong or I'm right
Maybe soon we'll find peace in another one
Say Goodnight

Understand that its here that I'm coming from

I don't mind if you're right
Maybe now I'll find peace in another world
Andy goodnight
