

# Safe Place

## Brianna Carpenter

Another day inside my world  
I'm married to you and this road  
The road that never lets me sleep

There's no way to escape these demons I am forced to keep And then I find you here

Through your eyes every thing's clear

And I'm home inside your arms

But I'm alone for now I mean the best with what I say

It doesn't always sound that way

I never learned to work things out

'Cuz in my family all we ever seemed to do is shout And then I find you here

Through your eyes every thing's clear

And I'm home inside your arms

But I'm alone for now, alone for now And I try to sleep

The drugs I take are killing me

I think of you to ease my pain, but you're so far

And now its time to say goodbye

I love you baby, please don't cry And then I find you here

Through your eyes every thing's clear

And I'm home inside your arms

But I'm alone for now, alone for now
