Hot Water Music

let's electrocute send ourselves in constant airwaves ringing out from voice to ear to free ourselves
from...there's an army charged, ready, armed to educate and demonstrate to the masses to the people left in the
dark with blinders on not holding back to activate never holding back to activate a full-fledged pledge to
eradicate with authorities that hold themselves higher a full-fledged pledge to liberate the minorities who only
want their rights to save ourselves from those who demonstrate to the masses to the people left in the dark with
blinders on not holding back to activate never holding back to activate in rebellion
