You

Stella Soleil

In your time of trouble
I wish that I could be the one
That you'd call at night
When you needed a friend
In your time of sorrow
I wish that I could be the one
To make you smile again
Its not over

its not over

Just start over

Oh you are so beautiful and special

Your my hero

You don't even knowYou are always there inside my mind

I'm so preoccupied

Sending love to you across the sky

So I never seem to get things done

Your the only one

I worry all the time

So I have to let you goIn your time of trouble

I wish that I could be the one

That you'd want to hold you

And tell you your fine

In your time of sorrow

I wish that I could be the one

To make you try again

Its not over

Just start over

Oh you are so fragile and so peculiar

You took a little detour

You feel a little unsure

Don't give up

There's a way out and you know it

Don't give upYou are always there inside my mind

I'm so preoccupied

Sending love to you across the sky

So I never seem to get things done

Your the only one

I worry all the time

So I have to let you goYou are always there inside my mind

I'm so preoccupied

Sending love to you across the sky
So I never seem to get things done
Your the only one
I worry all the time
So I have to let you goYou are always there inside my mind
I'm so preoccupied
Sending love to you across the sky
So I never seem to get things done
Your the only one
I worry all the time
So I have to let you go
