

# My First Night With You

Deborah Cox

Yesterday was not just another day  
Not like before  
Yesterday I saw your smiling face  
Love walked through my door One precious moment changed my life  
One tender kiss made everything right  
One touch from you and this world was mine  
It was in your arms where I found forever Cried my first tears of joy last night  
Heaven shined a light  
All my dreams came true  
My first night with you Felt the sun shine so bright on me  
Chased the rain from my heart  
Through a storm, through the darkest night  
I found my brightest star One magic moment made one magic night  
I fell in love with one look in your eyes, baby  
I never knew I could feel so alive  
Darling, in your arms I could feel forever Cried my first tears of joy last night  
Heaven shined a light  
All my dreams came true  
My first night with you, oh yeah, yeah One precious moment changed my life  
One tender kiss made everything right, baby  
One touch from you and this world was mine  
It was in your arms where I found forever Cried my first tears of joy last night  
Heaven shined a light  
All my dreams came true  
My first night with you Cried my first tears of joy last night  
Heaven shined a light  
All my dreams came true  
My first night with you
