Imaginary entity

Darkane

Twisted forms implanted in y mind
Choked by the fear of the unknown
The virtual being exists
Anguish rising inside, abnormal behaviorShow no feelings, nor good nor evil
The apathy of a depressed human sense
Deep in this black soul lies the final horror
Take a step into your personal hellTry to identify the unrecognizable vague shadows
Elaborate fantasies or definite reality
Denial, the best way to protect a weak mind
The state of protection evolve into possessionHave to have some kind of belief or, psychosis is near
Unable to separate impressions, paranoia sets in
Amnesia the utter protection towards, a world full of illusions
Compassion is something I never felt
Psychotic features a major depressionLife will now fade
A state of void
Haunts my soul
Life will now fade
It haunts my soul
Haunts my soulTry to identify the unrecognizable vague shadows
Elaborate fantasies or definite reality
Denial, the best way to protect a weak mind
The state of protection evolve into possessionHave to have some kind of belief or, psychosis is near
Unable to separate impressions, paranoia sets in
Amnesia the utter protection towards, a world full of illusions
Compassion is something I never felt
Psychotic features a major depressionLife will now fade
A state of void
Haunts my soul
Life will now fade
It haunts my soul
Haunts my soul
