Everything Changes

grafton ash

This year I'm gonna make you a promise
Close your eyes, take a breath and let me say it
Feel what it's like when we're together
My heart will never find me another

Standing on a bridge in central Paris
We share a kiss, take a breath and then I say it
Search for the ring lost in my pocket
In the other is a padlock go and lock it

Cause everything changes
When your hand is into mine
Everything changes
When your heart is on the line
We'll make mistakes and go through phases
Because we know everything changes

Nine months ago I made you a promise
Now we're here losing sleeps
And there's more of us
I though my heart would never find another
But then it went on and made you a mother

Cause everything changes
When your hand is into mine
Everything changes
When your heart is on the line
We'll make mistakes and go through phases
Because we know everything changes
Because we know everything changes

Cause everything changes
When your hand is into mine
Everything changes
When your heart is on the line
We'll make mistakes and go through phases
Because we know everything changes

We know what it takes to last ages
Because we know everything changes

Because we know
Everything changes
