

Goldmine

Joel Rafael

Goldmine
by Joel Rafael

You and I been through this, a thousand times before
When do you think it will be over?
It always makes me feel like walking out the door
To fight this way with my lover
'Cause we don't need this pain inside
Take back yours and I will take back mine
Should we both miss our foolish pride
We just might find a goldmine
Sometimes it seems like things just can't be right
And my heart feels so dark and lonely
But in a little while, time turns on its light
Then I just want you to hold me

Chorus

So maybe someday you and I can find the time and the place
To make our lives a perfect union
But until the we'll have to learn to live with what we've got
'Till we take that last communion

Chorus
