Play The Night

Hadouken!

Here's no morning in sight
If you hear the beat then play the night

There's no morning in sight
If you hear the beat then play the night

There's no morning in sight
If you hear the beat then play the night

There's no morning in sight

Get fucked
Get fucked up
Jump up
Get fucked
Get fucked up
Pumped up

You gotta push beside that
If you got a lighter, light that
Twist it, when you hear the film come
Turn your back, when you see the first sun

Don't stop, give it in despite that
Your gonna play the night here
We got one more hour
Man your tower
You can fight that

Get fucked
Get fucked up
Jump up
Get fucked
Get fucked up
Pumped up

Help is falling out my eyes and
As bored as the gravity
Help we're burning out
And my eyes are as the glare burns deep down now

Help we're burning out
We retract these walls as the heroes fall
