One Of Us

Taleteller

Too late, I spoke too soon
On the dark side of your moon
Floating 'round you like an astronaut
Seems like you can't convey
The words I wanna hear you say
And now I'm floating like an astronaut, an astronaut
How am I gonna get to where you are
When you seem so far away
One of us has to say goodbye
One of us has to know
That one of us has to be
The one of us to let it go
Your world has turned around
I'm orbiting you upside down
Floating 'round you like a satellite
Once you, were close to me
But now it seems eternally
I float around you like a satellite, like a satellite
How am I gonna get to where you are

When you seem so far away
One of us has to say goodbye
One of us has to know
That one of us has to be
The one of us to let it go
I've been wishin' on a star
I'm flyin' in my car but you're nowhere
Too late, I spoke too soon
On the dark side of your moon
One of us has to say goodbye
One of us has to know
That one of us has to be
The one of us to let it go
One of us has to say goodbye
One of us has to know
That one of us has to still
One of us, one of us to let it go
One of us, one of us
