Breathe Without Me

Melissa Otero

You dug your own grave
Now you can rest in peace
How does it feel since you can breathe without me?You thought I didn't know
But I'm smarter, you see
I've been there before
You can't hide from meYou thought I'd be a ghost that would go away
You saw me burn and caused my painSince you decided what you wanna be
Your childish ways will set you free
I'm woman enough to stand against your tide
Windpipe's not closed so you can breathe without me, so you can breathe without meYou left me in the wake of your company
A mirage it seems, in misery
You thought it clever to replace me
Or so you think, just wait and seeWhen darkness falls you'll feel so lonely
Oh she can't mend you babySince you decided what you wanna be
Your childish ways will set you free
I'm woman enough to stand against your tide
Windpipe's not closed so you can breathe without me, so you can breathe without me
