I Want to Leave You

Elan Mehler

It's getting late and I'm tired to the bone
I wanna leave you but I don't wanna be alone

I see the shadows moving and I hear the telephone
I wanna leave you but I don't wanna be alone

The nerves are jumping and my heart feels like a stone
I wanna leave you but I don't wanna be alone

After the sun goes down and before the moon rises
there's a darkness too deep to dream
and all the lovers come out
and they shake like fluorescent light they sing

"baby baby baby let's try to have a good time tonight"

Try to be good and treat you like I should
I wanna leave you but I don't wanna be alone

Ask me if I mind when you go out on your own
I wanna leave you but I don't wanna be alone

And I've already lost a good friend I had known
I wanna leave you but I don't wanna be alone

After the sun goes down and before the moon rises
there's a darkness too deep to dream
and the radio plays
those old songs we forgotten and sings

"baby baby baby I wanna have a good time tonight"
