

Tears Fall Down

[Heidi Newfield](#)

I know how to hold you til the morning sun comes up
I know how to kiss you til you just can't get enough
I know how to draw you in from across a crowded room
And when you get to me boy, I know what to do But I don't know nothing bout this heartache
I don't know how to watch my whole world walk away
You told me I'd survive it some way
So tell me what do I do now
When tears fall down
When tears fall down Now I hear my lonely voice echo off these walls
I listen for the phone but you don't ever call
I lay in the bed alone and still reach out for you
But this house ain't nothin but a cold and empty tune But I don't know nothing bout this heartache
I don't know how to watch my whole world walk away
You told me I'd survive it some way
So tell me what do I do now
When tears fall down
When tears fall down I do not like this place
It's got me so afraid
This ain't the promise that you made to me I don't know nothing bout this heartache
I don't know how to watch my whole world walk away
You told me I'd survive it some way
So tell me what do I do now
When tears fall down
When tears fall down
