Tracks

ROAM

How did we get this far on our own feet
I'm slowing down
Chasing things that I thought, were dead to be beat
Now scream at our feet
And there is not much to say
But we've both been thinking how
We can push, stay alive
When the gears stuck in drive
You're by my side

And I tried to stay awake while you fell asleep
Still miles away from the company I keep
I honestly try to keep you in mind
I know that I'm selfish and I know you don't mind

I've been dragging my heels in attempts to leave tracks
Hoping that someday soon I can follow them back
Cause we both made mistakes and I'm paying for mine
I'm further in distance for more of the time

Not the same talking through a phone screen
Were losing now and I've been counting down the days
And I know you do the same
I know you do the same

I tried to stay awake while you fell asleep

I tried to stay awake while you fell asleep
Still miles away from the company I keep
I honestly try to keep you in mind
I know that I'm selfish and I know you don't mind

I've been dragging my heels in attempts to leave tracks
Hoping that someday soon I can follow them back
Cause we both made mistakes and I'm paying for mine
I'm further in distance for more of the time

I've been dragging my heels in attempts to leave tracks
Hoping that someday soon I can follow them back
Cause we both made mistakes and I'm paying for mine

I'm further in distance for more of the time

I've been dragging my heels in attempts to leave tracks
Hoping that someday soon I can follow them back
Cause we both made mistakes and I'm paying for mine
I'm further in distance for more of the time
