Not That Simple

dredg

Remove my hands and feet
Watch me crawl on my stubs
Throw me to the street
Watch me fall on down head firstIts not that simple
I needed this from the start
To guide my way, to be okay
Its made life simple
It needed this from the start to wake upIf all else fails, if all turns to dust
Set sail on a ship built from trust
If all else fails and it all starts to rust
Set sail on a ship built for usIt's time to retreat
Sawed it down to the bone
The canyons are too deep, yeah
Decided to run like a child
Decided to run to rescue
It took too long to wake upIf all else fails, if all turns to dust
Set sail on a ship built from trust
If all else fails and all starts to rust
Set sail on a ship built for usIts not that simple
Needed this from the start
To guide my way, to be okay
Its made life simple
I needed this from the start to wake upIf all else fails, if all turns to dust
Set sail on a ship built from trust
If all else fails and all starts to rust
Set sail on a ship built for us, for us, for us
