Mediator

Belvedere

I'm making restrictions and placing convictions
upon my rough decision you comply
cause my job applies when two sides collide
just respect those binding contracts live or dieIt's cause some lessons can't be taught
and some might say that realism and favors can be bought
(open your eyes)
and that's why objective as i am i might just take it awayI know you won't budge but i'm just like a judge
and i hope that both defendants understand
what i say is binding so stop all the whining
and look at the respect that i demandI spend my days on this and that
experienced mediation over things that might go wrong
(that might go wrong)
and that's why objective as i am i might just take it awayI spend my days off breaking up promises
but my mind's made up and i'm getting back to what matters first this time
I spend my days off breaking up promises
just look inside and you'll see what happens when you forget to signIt's cause some lessons can't be taught
and some might say that realism and favors can be bought
(open your eyes)
and that's why objective as i am i might just take it awayI spend my days off breaking up promises
but my mind's made up and i'm getting back to what matters first this time
I spend my days off breaking up promises
just look inside and you'll see what happens when you forget to signI spend my days off breaking up promises
but my mind's made up and i'm getting back to what matters first this time
I spend my days off breaking up promises
but my mind's made up
