You Are

Estelle

Every little
Every little
The first time I met you, you were so quiet and cool you
Never thought that you would catch my heart the way you did
All of the sadness in passing, making me feel like I'm past it
But you really end in the sweetest way
Oh, I'm so enamored by you, all in my music are you
Duly keeps me serving on the hope that we can be together are you
I hope you listen to this, I hope you get to feel this
'Cause everything is you, come on
Come close to me, only your love can do me
Every little thing I do you are
Baby you know you're special, I don't care what the rest do
Every little thing I do you are
If love had a face then it's you, made for me how did you know
The best type of love and who must have led you to hurt me
If there's anything I can do, let me know I'll be a fool
But don't take advantage 'cause I will hate to have to leave you
Your touch makes me feel like a woman, takes me beyond feeling human
When you touch me, ooh, the smell of you drives me crazy
When we're alone it's beautiful, makes me not want to leave you, no
Everything is you
Come close to me, only your love can do me
Every little thing I do you are
Baby you know you're special, I don't care what the rest do
Every little thing I do you are
Come close to me, only your love can do me
Every little thing I do you are
Baby you know you're special, I don't care what the rest do
Every little thing I do you are
Oh, when you're lying next to me, I can't believe you're next to me
It's only us in this moment, no interruptions we focus
Tell you I'm glad I risked it, God knows that I would have missed it
You're so amazing baby everything you do
Come close to me, only your love
Everything little thing I do you are
Baby you know you're special, I don't care about the rest
Everything little thing I do you are
Baby you are, baby you are

Baby you are
Baby, everything little thing I do you are
