Camera

Editors

Keep close to me now
I'll be your guide
Once we have black hearts
Then love dies
Look at us through the lens of a camera
Does it remove all of our pain?
If we run, they'll look in the back room
Where we hide all of our feelings
I'll just close my eyes as you walk out
I'll keep your eyes wide open tonight
Keep the car on the road now
Feel love bite
Look at us through the lens of a camera
Does it remove all of our pain?
If we run, they'll look in the back room
Where we hide all of our feelings

I'll just close my eyes as you walk out
You fall from grace, we fall with such grace
You fall from grace, we fall with such grace
You fall from grace, we fall with such grace
You fall from grace, we fall with such grace
Look at us through the lens of a camera
Does it remove all of our pain?
If we run, they'll look in the back room
Where we hide all of our secrets
I just close my eyes as you walk
I just close my eyes as you walk
I just close my eyes as you walk
I just close my eyes as you walk
I just close my eyes as you walk
I just close my eyes as you walk out
