Fire of the Dragon

Blackfoot

A young man lies with a needle in his arm, Say a little prayer for his unlucky soul China white in his hand It's so sad, so sad Fire Of The DragonA pretty girl walked the streets Fire Of The Dragon The scene was set and the time was right Turn a trick or two and she'll get Lookin' for a hand outJust what she needs 'Cause it's the outlaw in the city Voodoo in our town And leaves them under the ground Steals the life from those you pity- Chorus: Fire Of The Dragon Dirty Dragon and took 'em to their

Promised land

He left his mark all over your handsMiddle East struck againCat Brown has a hit the streets When you're shakin' and your body's so weak So at night when you're naked with your bride It seems you just can't win Think about the young man and his lady love Think about what I've said It's so sad, so bad'Cause it's the outlaw in your city Voodoo in the town Stole the life from those you pitied And left them under the groundRepeat Chorus
