## Wide Awake

## **Jonezetta**

Wide awake Fear is now the only thing that's keeping me Wide awake With no evidence your new defense is useless You can find your way around it, the obvious truth Back when inebriant and ignorant and cruel I was spinning all around just waiting here for you To find your way in Hoping you find your way in 'Cause I'm wide awake You are now the only thing that's keeping me Wide awake Yeah I'm wide awake Fear is now the only thing that's keeping me Wide awake You were brilliant turned hesitant fool

You just have to look around you'll figure out its true That when inebriant you're ignorant and cruel And I'm the fool standing here waiting up for you To find your way in Hoping you find your way in [chorus]Fearing me obsolete... Thinking I should clear out my mind So I can't Hesitate, complicate, anything anymore It's a Slow defeat empty sheets look at me lying on the floor It's a Slow defeat empty sheets look at me wanting so much more [chorus]
