Recipe

Aura Dione

Hold me like I?m a baby I will always be safe in your arms I?m filming and I'm dreaming I?m humming my way to the stars I can reach the stars from where I am I can reach the stars from where I am Tell me what is the recipe, secret of eternity No more love me or leave me Not a year not three or four Forever is in my heart with you evermore Stand by me I am your baby You will always be safe in my arms This season I don?t think about reason I just wanna lose it and wish upon the star I can reach the stars from where I am I can reach the stars from where I am

Tell me what is the recipe, secret of eternity No more love me or leave me Not a year not three or four Forever is in my heart with you evermore We can take it far, to the morning star A thousand children laughing in your eyes You were made for me, baby can?t you see The endless sky is filled with butterflies Tell me what is the recipe, secret of eternity No more love me or leave me Not a year not three or four Forever is in my heart with you evermore Tell me what is the recipe, secret of eternity No more love me or leave me Not a year not three or four Forever is in my heart with you evermore
