# No Pity

## Wax Tailor

Not much time to stay alive
Try the hard way take a dive
Got a new one call it sue
won't be long now coming through
Have your own way I don't care
This is my way ?solitaire?
In the event of going insane
Whatever I loose will be my gain

We're gonna make you fall
We're gonna take it all 'cause we have no pity

Take what's yours don't wait for me
I believe its all for free
Thinking fast now make our move
It's a hard thing to improve
Show me your integrity
You're no better than me
Give me all that you possesses
It's my answer to success

Don't ask me to remain aloof
Seek yourself or tell the truth
Got no shame that's how I feel
Don't you ask me to conceal
Show you my anatomy
Be a real good thing for me
Had to happen to collide
All because you really tried
