Together

The xx

I know to be there
When and where, Ill be there
You know whats to be said
We said out loud, we never said
My premonition of the world comes to me
A sun in your hands from the middle life
Says Im alrightYou said you dont have to speak
I can hear you
I cant feel all the things youve ever felt before
I said its been a long time
Since someone looked at me that way
Its like you knew me
And all the things I couldnt sayTogether, to be
Together and be
Together, to be
Together and be
Together, to be
Together and be
Together, to be
Together and beTogether, to be
Together and be
Together, to be
Together and be
Together, to be
Together and be
Together, to be
Together and be
