

Little District (Acoustic Version)

Sublime

oh in a little district in a neighborhood
people moving swift like they think they should
a word from your mouth your lights get knocked out
a glass to your lips and later you'll move and slip
and if you have to don't trip
i don't know how they manage
but believe me mister they do
if you ever lived there you just
listen and don't be no fool

in a little district in a neighborhood
people moving swift like they think they should
a word from your mouth your lights get knocked out
a glass from you lip and later you move and trip
if you have to just slip,no one ask no questions
no one tell no lies listen to me people is the
reason why,a word from your mouth your lights
get knocked out,a glass from your lip and later
you move and trip,and if you have to just slip
i don't know how they manage but believe me
mister they do,if ya ever lived there you just
listen and don't be no fool

in a little district in a neighborhood
people moving swift like they think they should
a word from you mouth your lights get knocked out
a glass from you lip,and later ya move and trip
