The Other Side

Tahiti 80

Would you like to go back before it turn black
Remember the other side
It's hard to go against the tide or walk if your step's behind
You can't make up your tired mindCould you like to take care, bring new stars
Close your eyes, throw one more dart
Again it's is a landslide and you feel trapped inside
Here comes another day, you are just too tired anywayIt goes on and on, still you don't know what to choose
Between good and bad you're not sure what you want to knowWhat do you want?
Mother take back pains, all the color's black
If something we shouldn't talk aboutWhat do you want?
Mother take back pains, all the color's black
If something you shouldn't think aboutAgain it's is a landslide and you feel trapped inside
Here comes another day, you are just too tired anywayIt goes on and on, still you don't know what to choose
Between good and bad you're not sure what you want to knowAnd it feels like you lost yourself away
And it feels like you lost yourself away into the other side
(Come on, come on, come on, come on, come on, come on)
And it feels like you lost yourself away into the other side
(Come on, come on, come on, come on, come on, come on)
And it feels like you lost yourself awayBetween good and bad
You're not sure what you want to know
Between good and bad
You're not sure what you want to chooseAnd it feels like you lost yourself away
And it feels like you lost yourself away into the other side
(Come on, come on, come on, come on, come on, come on)
And it feels like you lost yourself away into the other side
(Come on, come on, come on, come on, come on, come on)Into the other side
