

Waiting for the Night

[Fiora](#)

Shoot me down and Ill get up again
Emotion running high with double meaning
Just another day to keep it calm within
But I cant find a way to fight this shadow dreaming
Were always waiting for the night
Never lost, we can go where the light shines brightest
Were always waiting for the night
So come with me and we can go where the light shines brightest
Stay all night, runaway all night
Well stay all night runaway all night
Push and shove against the thoughts you left me with
Every picture of regret my expectation
Your emotions cant hide behind those eyes
Conversations come quick to steal me back again
Were always waiting for the night
Never lost coz we can go where the light shines brightest
Were always waiting for the night
So come with me and we can go where the light shines brightest
Stay all night, runaway all night
Well stay all night runaway all night
