Let There Be Light

Golden Shovel

I portray these articles in seed form they feed from my roots
My pen remains ahead of the worms that feed from my books
Take a free ride on my train I'm on a trip the truth I star in a dream of a starving artist that who sleeps in the booth
Let me go and speak to the youth quote from a list of my views I wrote a speech with a new approach that keeps you in tune
I throw seeds and feed a few chosen kids on the move
I blow trees and lift that blue broken spirit in you
I know life is a gift that's why I wrap it on mics
I paddle flows like I laid my verse on the bike
I heard of the hype but I chose to serve when you fight
I only shoot when I'm fully loaded with words on the pipe
Yo, Shovel emerged with the mic when you searched for the light
(Word is) my queen verse is pushing during the birth of a rhyme
Optical orbits the earth with an eye
We don't rap nomore we view the world and tell the universe to recite

Chorus

Let there be light. Let there be life. Let there be a platform where kids can feed of what they feel like
I keep the glory in the fist of the young
I play a star just to get and receive from the son
Now let there be light. Let the life. Let there be a platfrm where kids can feed of what they feel like.
I'm sparking this with a thought
rocking this for the cause
World wide touching the rich and the poor

Verse 2

Now can I proceed to throw these mighty prolific words right on the dope beat and only smoke a soul out of a poem tree
(cause slowly I) breath life in the lungs of most kids
I close these eyes and see the light in the mind that knows me
(Is only right)
When watching my thoughts reflecting these highly exclusive ingredients of pure perfection
Purely inserted on raps
Surely infected raw cats
I only keep an evergreen substance injected on tracks
Truth is I do this for music as art
Truth is I move a chosen few when I rock

Yo the truth I got it locked like jail cells
I played well field of lecturing nations to prevail hell
I employed poetry to strengthen the spirit
Prayed for the world to once ignore beats and dance to the lyrics
Since many men murdered the art we all wonder what happened but I'm here to bring it down to a level of understanding

Chorus
