

Let the Hammer Fall

Hammerfall

It's getting closer now
The clock strikes midnight time
It is the tolling of the judgment bell You fear the dead of night
There ain't no place to hide
This is your point of no return Now we are ready to strike again
It's getting far too late, my friend
Let the hammer fall We are above the law
Let our power show
That we're in full control of your destiny Now we are ready to strike again
It's getting far too late, my friend
Let the hammer fall We're getting closer now
The chill of distant eyes
You're on a dead end street into the night Now we are ready to strike again
It's getting far too late, my friend
Let the hammer fall Let your hammer
(Fall)
Let your hammer
(Fall)
Let your hammer
(Fall)
Let your hammer
(Fall)
Let your hammer fall
