

Hurricane

The Next Step

Hurricane going through my brain
You know you left me nothing
Feelings i can't explain
We pushed it hard
We made it work
It made us betterDon't wanna drown in the water
Hurricane
Burn out my weather vain
We though we get away
That love was thicker than water
Love was thicker than waterAnd now it'sout of control
You could be a hurricane
As you leave a trail of dust on the ground
Don't you know it's such a shame
To burn off just as you reach the ground
The definition of a hurricane in love
You sweat and you storm
and you loveAnd you've taken
My soul, My soul, My soul
It's taken me
Over, Over, Over
It's taken
My soul, My soul, My soul
And now it's out of control(music)
Hurricane can't even say your name
You know you left me full of fellings I can't distain
We came so far
Through stormy weather
We always told each other
Love was thicker than water
Hurricane going through my brain
You know you left me nothing
Love was thicker than water
Feellings i can't explain (Ã—3)
Love was thicker than water
Love was thicker than water
And now it's out of control
You could be a hurricane
As you leave a trail of dust on the ground

Don't you think it's such a shame
To burn off just as you reach the ground
The definition of a hurricane in love
You sweat and you storm and you love
and now you've taken my soul
You could be a hurricane
As you leave a trail of dust on the ground
Don't you think it's such a shame
To burn off just as you reach the ground
A definition of a hurricane in love
You sweat and you storm and love
And now you've taken
My soul, My soul, My soul
It's taken me
Over, Over, Over
It's taken
My soul, My soul, My soul
It's taken me
Over, Over, Over
And now it's out of control
(music)(finish)
