Nothing Wrong

Domani

(VERSE 1)
Ask if I'm stressing if you can't tell from expression
Everyday a blessing when you get across a message
The lesson of this session is to overcome depression
From the ones that's tryn a stop your talents you was blessed with
Expected to be tested messed with and dont accept it
Showing you selected for a reason and respected

(HOOK)
They say everything happens for a reason
Well I'm just trynna figure out the reason
x2
There's nothing wrong with feeling lonely
There's nothing wrong with not knowing where home is
There's nothing wrong being the only, one of your kind willing die for your homies

(VERSE 2)
Everyday I ask myself how will I be remembered
I'll never make my mark by just looking out the window
That's why it frustrates when hear some people say
I need to slow it down I be out working to late
I know I'm 15 and I get it but just listen
How could you put a limit or a lid on a vision
A vision that's beginning, seeming clearer by the minute
Am I suppose to put a pause on my future cause you timid
Or am I supposed to live my life in fear, if it's going happen it's going happen thought he mad that clear
The only thing I can control is how I'm going out
So until that day just know Domani showing out
