Inside The Winter Storm

Dragonforce

Strangers they come with their eyes on the sun
To escape from this madness forever
Rivers run dry bringing holes in the sky
As the empire is fading away
Silently march now, we're lost souls run wild
In a time long forgotten forever
Hate brings our sadness and the dawn of the war
But this nightmare will still carry on
Through the day we'll find a way, we're lost beneath the stars
Faceless we follow and we all stand as one
Long wasted tears, the light forever shining
One stand, one last demand to end it all
Outside the world in the fallen land, turn away from my despair
We stand alone in a silent dream, lost within eternally
Whoa, whoa
Rise again and try to understand
A light for the world will save us tonight
Redemption still so far away
Marching on inside of our loneliness
Still searching for all that remains
And time will pass me by, the light not so far away
Will the sons of the night
Now life blood runs into the ocean

Tomorrow we're gone, our souls rising up to the sun
A light for the world will save us tonight
Redemption still so far away
Marching on inside of our loneliness
Still searching for all that remains
It's just one wasted man in one wasted land
Suffering so far and so alive
It's just one wasted man in one wasted land
Until the end of time inside the winter storm
Outside the world in the fallen land, turn away from my despair
We stand alone in a silent dream, lost within eternally
Whoa, whoa
Rise again and try to understand
A light for the world will save us tonight
Redemption still so far away

Marching on inside of our loneliness
Still searching for all that remains
It's just one wasted man in one wasted land
Suffering, still feeling so alive
It's just one wasted man in one wasted land
Until the end of time inside the winter storm
Inside the winter storm
