# Now I Know What Made Otis Blue

## Paul Young

You got a hold on me, hey, don't you know?
We've gone too far for me to let you go
You throw my love away and then you try
To see it burning in a stranger's eyeI remember the good times
I remember the things we used to doNow, I know what made Otis blue
Girl, it must be love that we're going through
Now, I know what made Otis blue
Every single night I keep wanting youDon't make me sleep alone, don't make me bleed
How can you waste your love in jealousy?
If we're together, baby, your eyes still see
There is no other lover here with meYou remember the good times
Do you remember when every word was true?There's no one else, only you
I'm begging you
Don't turn your heart too restlessNow, I know what made Otis blue
Girl, it must be love that we're going through
Now, I know what made Otis blue
Every single night I keep wanting you
