

# Six Feet Closer to Hell

## Carnifex

If the world's going to end then let it end  
On my knees and I'm sick to death  
Put that bullet in the barrel  
And we know what happens next This is the end  
I feel it in my chest  
Laid to rest If the world's gonna end then let it fucking end  
I'll be right here as the flame burns bright  
We're all dying in slow motion  
Nameless, faceless and hopeless Die without hope  
Got stuck inside my head  
Every word I wrote pushed me closer to the end  
Dreams of death just for pretend  
A final breath, laid to rest  
Six feet closer to hell  
Going down  
Six feet closer to hell, yeah  
Six feet closer to hell A final breath, laid to rest  
Six feet closer to hell A final breath, laid to rest  
Six feet closer to hell These are words for the hopeless  
Only they would understand  
Cut us open, torn and broken  
I feel just like death Just let me slip away  
I have myself to blame  
Let the blood fill my lungs  
I hear the dead scream my name  
If the world's gonna end then let it fucking end  
I'll be right here as the flame burns bright  
We're all dying in slow motion  
Nameless, faceless and hopeless  
Hopeless, hopeless Six feet closer to hell  
Six feet closer to hell If the world's gonna end then let it end  
On my knees and I'm sick to death  
Put that bullet in the barrel  
And we know what happens next This is the end  
I feel it in my chest  
Laid to rest Die without hope  
Got stuck inside my head  
Every word I wrote push me closer to the end  
Dreams of death just for pretend

A final breath, laid to restSix feet closer to hell

Going down

Six feet closer to hell, yeah

Six feet closer to hellA final breath, laid to rest

Six feet closer to hellA final breath, laid to rest

Six feet closer to hell
