

Light of Day (Two mamarrachos edit T2MM)

Little River Band

Many a time the thought crossed my mind
Wonderin' 'bout people who walk around blind
They don't seem to see the light of day
Everything is just okay Taking no heed of what they can learn
Running in circles, no point of return
Heading for the door that reads escape
Anything that they can take Hey boys, come out and dig the dance
Come on and take a chance
Believe in the light of day Lonesome nights and wasted days
Leads a man from his true ways
Yet he tells you he nobody's fool
Breaking every golden rule Hey boys, come out and dig the dance
Come on and take a chance
Believe in the light of day Keep a watch on the sandman of time
Will he gaze into your eyes or mine?
Will he knock on your door and invite you to the other side?
Catch him writing the score as he takes you on another ride
Hang on tight boy, you're starting to slide Hey boys, come out and dig the dance
Come on and take a chance
Believe in the light of day
Believe in the light of day
