

One Last Try

Tim Gearan

Come now, calm me down
Won't you do your thing
Get my blood all pumpin
My knees all jumpin
Make my little heart sing
Little heart sing, Little heart ittle heart sing
Little heart little heart sing

Come now, calm me down
What's taking you so long?
You used to be a friend to me
Get my head all high and strong
high and strong
high and strong
high and strong

We had ourselves some times we did
Chugging like an old coal train
You all brown and liquified
Rolling through my viens
through my viens
through my viens
through my viens
through my viens

Come, now, calm me down
I know you'd understand
there's a part of my heart
I know wil never mend
never mend
never mend
never mend
never mend

Come now, calm me down
I'd hate to say "good bye"
It seems like two old friends like us
Should give it one last try
one last try
one last try

One last try
One last try

Come now, calm me down
Won't you do your thing
Get my blood all pumpin
My knees all jumpin
Make my little heart sing
Little heart sing, Little heart little heart sing
Little heart little heart sing
