

# When They Came for Us

## Shiny Toy Guns

Why are the Robots so sad?  
Were not in trouble anymore anyway  
And no more synthetic fighting  
They stopped the lightning after today  
When they took the beach that day  
They stole the children, took them away  
And I miss everyone but most of all the little ones  
And their shiny toy guns  
Each and every one of us still pray  
Hoping for evidence, looking for clues  
All the robotic families searching the circuitry  
For what remains  
When they took the beach that day  
They stole the children, took them away  
And I miss everyone but most of all the little ones  
And their shiny toy guns  
I remember mother that day  
When her tears woke us so quietly from our dreams  
She told us that father's sleeping  
And he is watching from far away  
And their shiny toy guns  
When they took the beach that day  
They stole the children, took them away  
And I miss everyone but most of all the little ones  
And their shiny toy guns
