

# Chemistry

## One Night Only

Maybe it's the chemistry  
The sparks that fly from you to me  
I touch your skin, I feel alive  
Been searching for you every night Where am I supposed to go?  
I'm hoping that you won't say no  
We've got all the time in the world It must be the chemistry  
Tonight  
I hope that you know  
I won't let you go this time It must be the chemistry  
Between you and I  
I hope that you know  
I won't let you go this time Underneath the starry sky  
You can bring me back to life  
I touch your skin, I feel alive  
Been searching for you every night Take me somewhere I don't know  
Watch all the people down below  
We've got all the time in the world It must be the chemistry  
Tonight  
I hope that you know  
I won't let you go this time It must be the chemistry  
Between you and I  
I hope that you know  
I won't let you go this time Yeah, yeah, yeah, yeah  
Yeah, yeah, yeah, yeah  
Yeah, yeah, yeah, yeah It must be the chemistry  
Tonight  
I hope that you know  
I won't let you go this time It must be the chemistry  
Between you and I  
I hope that you know  
I won't let you go this time
