

Chain Reaction

Journey

I bet you, she's the one
Who helped you, come undone
Those changes she put you through
Long, long distance, you're overdue I bet you, she'd like to say
She's changed you in every way
She's so sure, now she's on the run
She ran a red lights, you jumped the gun Chain reaction, shades of passion
(Chain reaction, shades of passion)
We surrender, lose control
(We surrender) So now you lived a mystery
You won't be just one more casualty
You stumble before you fall
Won't be the last time, no, not at all In motion, it's on her way
The red light, somebody's got to pay
Those changes she put you through
Long, long distance, you're overdue Chain reaction, shades of passion
(Chain reaction, shades of passion)
We surrender, lose control
(We surrender) Chain reaction, strange attraction
(Chain reaction, strange attraction)
Love's a viper, steals your soul
(Love's a viper) So now just where do we go
Tell me where Chain reaction, shades of passion
(Chain reaction, shades of passion)
We surrender, lose control
(We surrender) Chain reaction, strange attraction
(Chain reaction, strange attraction)
Love's a viper, steals your soul
(Love's a viper)
