

Live and Let Fly

Jorn

Advisory - the following lyrics contain explicit language:

Heads above the water
But too close to the slaughter
 Life on the run
 No justice done
 Time for hell and thunder
The mind can pull you under
 Hauling you back
 Into the black
 Moving with the dark
 will bring you pain inside the heart
And burn you deeper like an arrow made of sun
 Rolling with the wheel
It makes you turn the way you feel
 From to joy to cry
You've got to live and let fly - yeah
 No sign of the morning coming
You were lost before the warning
 Came here to shock
 Children of rock
 Don't need a new religion
The past is not forgiven - no
 Inside the night
 We've found the light
 Living in the cold
Will freeze the chain around your soul
and leave you stranded on this desolation boulevard
 Before we end up old
We dream of streets made of gold
 And then we die
So I say live and let fly - yeah
 I was born here to deliver
 I'm pouring like a river

The strain is back
Coming down the track
Get on the roller-coaster
Your faces on the poster
No need to blush
Just feel the rush
Baby it's a sacrifice
But you will have to roll the dice
And pay the price for things you've never done
Life inside this old machine
Is blinding your forgotten dreams
They blind your soul and steal you from the starlight
The tower of the wall
Must rise again after the fall
And into the sky
Live and let fly - yeah
Got to live
Before you die
Live and let fly
