

# Things Will Never Be the Same (Instrumental)

## Got A Girl

Stop, please stay no more  
And when you leave please close the door  
I don't wanna know what a waste you're there  
Beyond these walls I'm not to care  
You're with me so keep your hands clean  
Yes, I know my place  
Dying more with each embrace  
Dim my lights, stay in the dark  
To keep my mind when we're apart  
Your secret's safe with me  
Cause I don't wanna know  
I can't believe you'll do such a thing  
That I'm made to fear your name  
No I can't believe what is killing me  
Is that we'll never be the same  
Look, make no mistake  
This blindness I am forced to fake  
I'll take your battered knuckles and your swollen ego  
I'm in this far too deep to let go  
Babe did you do it all for me  
You, did you stop to see  
The fool that you have made of me  
Am I a trophy girl, am I a little flower  
That you use to show the world your power  
Maybe soon you'll see the real me  
How much I really know  
I can't believe you'll do such a thing  
That I'm made to fear your name  
No I can't believe what is killing me  
Is that we'll never be the same  
Don't know why but I still love you  
Even though I know one day I'll rise above you  
I can't believe you'll do such a thing  
That I'm made to fear your name  
No I can't believe what is killing me  
Is that we'll never be the same
