

Together We Live, Together We Love

Golden Earring

I send my bird to a golden cage
Where it can sing it's song of love, love
It takes along the golden key
Than you unlock the door of love
Then think of me, then think of me
Cause I send you this golden key
When you accept this little gift
Remember please the song of love
And when you're ready
Then show it now

That you're in love
Then think of me, then think of me
Cause I send you this golden key
Together we live together we love
Together we live together we love
Together we live together we love
Together we live together we love
