Let The Spirit Carry Me

Howard Jones

People come together it's time for a union
C'mon c'mon c'mon lets do it right
When the darkness takes control and we lose the reason
C'mon c'mon c'mon lets see the lightWell let the faith shine down on me and let the spirit carry meTo a place where the stars don't know your name
To a town where the children fly
To a city where love comes naturally
In a country where devils die
I want to be there one more timeWhen my brain is on the floor I need you to help me
C'mon c'mon c'mon don't watch me die
And a friend is someone that you allow to help you
Carry me back carry me back hear me cryWell let the faith shine down on me and let the spirit carry meAnd I dreamt of a love that knows no gain
And our guilt didn't paralyse
Men and women and children can walk free
In the world where our devils die
I want to be there one more timeI want to be there one more time, I want to be there one more timeTo a place where the stars don't know you're name
To a town where the children fly
To a city where love comes naturally
In a country where devils die
I want to be there one more timeWell let the faith shine down on me and let the spirit carry me
