

# Us Two Can Play

## Whistle Peak

feel the dogs at my feet  
I feel an itch in my leg  
whenever you start to speak  
you issue a \_\_\_\_ (?)  
you give yourself away  
and you claim another point of view  
i did not need to say  
you always knew

there's a game us two can play  
nothing's changed, no one is to blame

i still sit in one place  
under an enormous weight  
everything is a little wave away  
no no no i can't say what i was supposed to do  
i did not need to say  
you always knew

there's a game us two can play  
nothing's changed no one is to blame
