Tron

Deathprod

Away, away in this system there is
Another country place we could go
Away, away in this system there is
Another country place we could go
Away, away in this system there is
A flower shop by which I mean to say
Away, away in this system there is
Another country place we could go
Away, away, away, away, away, away, away
If something won't heal
Children can help you out
If something won't heal
Children can help you out
If something won't heal
Compass can help you out
If something won't heal
Children can help you out
Away, away in this system there is
A flower shop by which I mean to say
Away, away in this system there is
Another country place we could go
Away, away, away, away, away, away, away

Away, away, away, away, away, away, away
Away, away, away, away, away, away, away
Away, away, away
Waste this all away, waste this all away
Waste this all, waste this all
Waste this all away
Waste this all away, waste this all away
Waste this all, waste this all
Waste this all away
Waste this all away, waste this all away
Waste this all, waste this all
Waste this all away
If something won't heal
Children can help us out
If something won't heal
Children can help us out

If something won't heal
Compass can help you out
Nothing's gonna end
Why don't we quiet down?
